

Information of China Compulsory Certification

Date: 5th November 2009

Dear Customers,

This is to inform you with our standpoint and preliminary notes, which is as of October 1, 2009, concerning China Compulsory Certification (hereinafter referred to as “CCC”), which has been implemented in China. Please see the following in detail.

As of now, we do not have any plan to obtain CCC for our products.

1. Our standpoint

- (1) When you export our Programmable Operator Interfaces or Industrial PCs to China, you can apply for an exemption to CCC as the industrial product, in case that the product is certified to UL508.
For details concerning the products certified to UL508, please refer to our manuals.
- (2) Please note that the exemption application is required to some accessories of our products too by CCC.
- (3) The attached table (Table 1) shows China HS Codes for our products that our company uses as of September 2009 and which product is required to apply for the CCC exemption and which is not.
In addition, you are responsible to apply for the exemption at the time of customs clearance in China.

2. Preliminary notes

Please be sure to have consultation in advance with Chinese relevant authorities, relevant agencies, or customs clearance agents, since the following situations may arise.

- (1) If you change operation settings including screen data for your product specification or you install our product into yours, you have to judge necessary conditions of CCC according to your product specification, regardless of whether UL508 is certified or not.
- (2) Chinese officers at the customs clearance make a final judgment on application of China HS code when products are imported to China. So, depending on the place of the customs clearance or importers, different judgment may be made or the HS code applied to the products may be what is unexpected.
- (3) Regardless of our standpoint mentioned above, you can apply for the exemption in the following cases.
 - The products you export are used as maintenance parts for replacement of equipment that is already in China.
 - The products are exported from China as final products.
- (4) Chinese laws and regulations, judgment of CCC, or the final decision made by the customs clearance are subject to change without prior notice. Our standpoint (including Attachment 1) is also subject to change after consultation with Chinese

relevant authorities. Therefore, please be sure to check for the latest information from clearance agents before exporting products.

Please contact us if you have any question. We look forward to your continued business in the future.

Sincerely yours,

Corporate Quality,
Digital Electronics Corporation

Report No.CQ-0032-09

Table 1 : China HS codes that our company uses (As of September, 2009)

No.	Product category	Product series (in English)	China HS code	Procedures
1	Graphic Operator Interface	GP, AGP, ST, AST, GLC main unit	85371090.9	Exemption application as products certified to UL508 is possible,
2	Graphic Logic Controller	LT main unit	8537101990	Not subject to CCC
3	Industrial PC	PL, PS main unit	84714140	Exemption application as products certified to UL508 is possible
4	Industrial Flat Panel Display	FP main unit	84716090	Not subject to CCC
5	Factory Gateway	Factory Gateway	85176239	Exemption application as products certified to UL508 is possible
6	Software	Software on CD/DVD media	85234020	Not subject to CCC
7		Software License only	49119900	Not subject to CCC
8	Accessories in common	CF Card	85235110	Not subject to CCC
9		Rubber Gasket	40169310	Not subject to CCC
10		Backlight	8539399001	Not subject to CCC
11		Screen Protection Sheet	39206200.04	Not subject to CCC Other regulations exist.
12		Function Switch Sheet for GP3000H	39206200.04	Not subject to CCC Other regulations exist
13		Protection Cover	39269090.9	Not subject to CCC
14		USB License key Module	84733090	Not subject to CCC
15		Signal conversion adapter	85369000	Exemption application as accessories of main unit is possible.
16		Cable with connector	85444211	Not subject to CCC
17		Cable without connector	85444911	Exemption application is possible if specification for cables is specified.
18	Accessories for Programmable Operator Interface	Power, I/O or communication module unit	85389000	Not subject to CCC
19		Interface cover	85389000	Not subject to CCC
20		Connector	85389000	Not subject to CCC
21		Emergency stop button	85389000	Not subject to CCC
22		Strap	85389000	Not subject to CCC
23		Stylus	85389000	Not subject to CCC
24		Installation accessories (rear cover etc.)	85389000	Not subject to CCC
25		Installation accessories for mounting	73089000	Not subject to CCC
26		Accessories for Industrial PC	CD, FDD drive unit	84733090
27	Installation accessories (rear cover etc.)		84733090	Not subject to CCC
28	Installation accessories for mounting		73089000	Not subject to CCC
29	Battery unit	Battery Unit	8507300000	Not subject to CCC Other regulations exist.
30	Hard disc unit	HDD unit	84717010	Not subject to CCC
31	Memory	Memory board or module	84717090	Not subject to CCC
